JUSSARA OMAR
Software Developer

I am a dedicated and hard-working individual, who is always eager to learn. I consider myself my biggest competition and I strive to out-do myself every time. I am very good at performing the tasks assigned to me to my fullest potential and try to produce results beyond what is expected of me. Eager to hear new, challenging ideas and working with a diverse group of people who help me discover different ways of looking at the world and deliver constructive criticism from which I can learn.
